PROFESSIONAL SUMMARY

Business Intelligence Analyst with 4+ years of experience transforming complex data into actionable insights that accelerate business decisions and drive measurable operational outcomes. Expertise in end-to-end dashboard development, KPI reporting, and reporting automation using Power BI, Tableau, and SQL across financial services and technology domains. Consistent record of gathering and translating business requirements into analytical frameworks, designing and automating ETL pipelines, and building scalable data models in Snowflake and BigQuery. Skilled in data storytelling and executive presentations that translate technical findings into strategic narratives for C-suite and cross-functional stakeholders. Committed to data democratization and enabling self-service analytics that drive data quality improvements, cost savings, and efficiency gains. Currently deepening expertise in statistical modeling and predictive analytics.

CORE SKILLS

Programming & Query Languages: SQL (Advanced), Python (Pandas, NumPy, Matplotlib, Scikit-learn), R, DAX, M Query
BI & Visualization: Power BI, Tableau, Looker, Looker Studio, Qlik Sense, Microsoft Excel (Advanced), Power Automate
Databases & Warehousing: Snowflake, BigQuery, Redshift, PostgreSQL, MySQL, SQL Server, OLAP, Dimensional Modeling
Data Engineering & ETL: dbt, Apache Airflow, SSIS, Informatica, ETL Pipeline Design, Data Modeling, Data Lineage, Data Cataloging
Cloud Platforms: AWS (S3, Redshift, Glue, Lambda), Microsoft Azure (Synapse, Data Factory), Google Cloud Platform (BigQuery, Dataflow, Pub/Sub)
Analytics & Methods: KPI Design, Statistical Modeling, Forecasting, Regression Analysis, Cohort Analysis, A/B Testing, Root Cause Analysis, Predictive Analytics, Clustering
Tools & Practices: Git, Jira, Agile/Scrum, REST APIs, Data Governance, Data Quality, Data Storytelling, Business Requirements Gathering, Stakeholder Management, Cross-Functional Collaboration

PROFESSIONAL EXPERIENCE

JPMorgan Chase & Co. | USA **Jul 2025 – Present**
Business Intelligence Analyst

- Architect and deploy 8 interactive Power BI executive dashboards tracking P&L, credit risk KPIs, and operational metrics across 5 business lines, compressing ad hoc reporting requests by 35% and delivering data storytelling presentations to C-suite leadership that accelerate strategic decision-making.
- Engineer automated ETL pipelines using Python and Apache Airflow to ingest and transform data from disparate financial systems into Snowflake, cutting daily data refresh latency from 6 hours to 25 minutes and improving cloud analytics availability for 75+ stakeholders.
- Optimize complex SQL queries and stored procedures against multi-billion-row transactional datasets, achieving 55% reduction in average query execution time and supporting real-time regulatory and financial reporting requirements.
- Develop and maintain dbt data models implementing dimensional modeling and data lineage best practices, improving reporting automation reliability and containing downstream transformation errors by 40%.
- Lead business requirements gathering sessions with risk, compliance, and technology teams across 3 Agile squads to define KPI frameworks and dashboard specifications, ensuring analytical outputs align with enterprise data governance standards and SOX compliance requirements.
- Design and deliver self-service analytics and data democratization solutions enabling business users to independently explore portfolio-level data, reducing BI team dependency by 28% and accelerating insight delivery by 4 days per reporting cycle.
- Automate 12 recurring financial reconciliation reports using Python, Power Automate, and REST APIs, eliminating 18 hours of manual effort per week across 6 analysts and compressing report turnaround time by 65%.

KPMG | India **Aug 2022 – Aug 2024**
Business Intelligence Analyst

- Built and maintained 20+ operation/management-level Tableau and Power BI dashboards tracking software delivery KPIs, resource utilization, and client SLA performance across 15+ active projects, increasing executive visibility through data storytelling presentations and streamlining manual status reporting by 60%.
- Designed and implemented a centralized data warehouse on PostgreSQL with full data lineage documentation, integrating data from 8+ source systems (CRM, ERP, project management tools), minimizing data reconciliation time by 45% and establishing a governed single source of truth for cross-functional reporting.
- Authored 150+ optimized SQL queries and parameterized stored procedures supporting weekly, monthly, and quarterly reporting cycles, cutting report generation time by 50% and driving reporting automation that eliminated recurring data inconsistencies.
- Developed automated ETL workflows using Python and SSIS to process and cleanse 500K+ records monthly from client and internal systems, improving data accuracy by 35% and eliminating pipeline failures by 70%.
- Conducted business requirements gathering with product, operations, and finance stakeholders to define 30+ KPIs and metrics, translating requirements into scalable dimensional data models and dashboard prototypes that accelerated business reviews by 2 weeks per quarter.
- Applied statistical modeling and regression analysis on customer usage data using Python (Scikit-learn, Pandas), uncovering a 38% drop-off at the onboarding stage and enabling a product redesign that improved user retention by 22% within one quarter.
- Built a data quality monitoring and data cataloging framework using SQL-based anomaly detection scripts and metadata tagging, independently identifying and resolving 90%+ of data integrity issues before they impacted downstream reporting.
- Enabled data democratization by designing a governed Power BI workspace with row-level security, curated datasets, and Looker Studio supplemental views, onboarding 40+ non-technical business users and reducing BI team ad hoc request volume by 30%.

RMS Technologies | India **Jun 2021 – Jul 2022**
Data Analyst

- Developed 6 SQL-based reports querying MySQL and PostgreSQL databases to track product performance and operational metrics, reducing manual data compilation time by 30% and supporting weekly team reviews.
- Created 3 Tableau dashboards consolidating customer support and delivery data from disparate spreadsheets, giving the operations team a centralized view that eliminated 5+ hours of manual reporting per week.
- Wrote 40+ SQL queries to extract, clean, and validate data across transactional databases, identifying and flagging recurring data entry errors that improved overall data accuracy by 20%.
- Performed exploratory data analysis using Python (Pandas, Matplotlib) on customer usage datasets, generating visualizations and summary reports that contributed to a product team decision to redesign a key onboarding workflow.
- Partnered with product and operations teams to understand reporting needs, translated requirements into structured data pulls and Excel-based dashboards, and presented findings to non-technical stakeholders, building cross-functional client engagement across 2 business units.

CAPSTONE PROJECTS

Predictive Workforce Planning & Spatial Analytics

Tech: SQL, Python (Pandas, NumPy), ArcGIS Pro, ArcGIS Dashboards, PostgreSQL, XGBoost, Time-Series Forecasting, BPMN, Confluence, Data Visualization

- Developed a predictive workforce planning solution using Python, SQL, and forecasting models, improving resource demand prediction accuracy by 15% across 450+ geographic service zones, enabling more efficient allocation of city resources and supporting strategic workforce planning.
- Automated GIS zoning and geospatial data processing workflows in ArcGIS Pro, reducing manual analysis effort by 60%+ and accelerating planning cycles through district-level resource allocation models that improved service coverage across operational regions.
- Designed and deployed interactive ArcGIS Dashboards tracking workforce demand, resource utilization, and operational KPIs for leadership teams, facilitating data-driven decision-making and standardizing reporting workflows through BPMN and Confluence documentation.

EDUCATION

Master of Science in Business Analytics **Dec 2025**
Arizona State University | Tempe, AZ

CERTIFICATIONS

Lean Six Sigma Green Belt | AWS Certified Cloud Practitioner | AWS Certified Solutions Architect | Alteryx Designer Core | Advanced SQL-HackerRank | Machine Learning Foundation Micro-Credential | Alteryx Foundational Micro-Credential
